Press Release

New company brochure

Introducing TechnoCompound

Bad Sobernheim, June 2006. – The German firm of TechnoCompound GmbH, Bad Sobernheim, is now presenting itself and its products through a new and amply detailed company brochure. Under the motto "Compounding and problem-solving from one source", TechnoCompound offers its customers not only a comprehensive range of standard compounds but also compounds with tailored properties and an advisory service based on many years' practical know-how and experience.

TechnoCompound's specialities include compounds containing up to 60 % w/w long glass fibres, which are marketed under the name of 'TechnoFiber'. Other products are TechnoPET (PET), TechnoMid (PA 6, PA 66), TechnoDur (PBT), TechnoElast (TPE) and TechnoFin (PP, PE-HD). These standard compounds are complemented by compounds with special properties, e.g. flame retardant, different degrees of hardness, UV stability and anti-static.

TechnoCompound's team of experts assists its customers in finding the best possible solutions to specific applications and also develops innovative products capable of meeting ever changing or ever more exacting market demands.

TechnoCompound, an offspring of the Engineering Compounds Division of Polymer Chemie, was established as a separate business entity on 1st December 2005. The company has an experienced work force of over 60 and operates high-performance production lines with a capacity of over 30,000 tonnes/year.
